

# What is PY-YAR Movement?

DB ARK through its PY-YAR (LOVE) Movement intends to inspire and accompany the young to discover the meaning of life and of the Divine, to learn, understand, and love one another with respect and equality.

We dream of a '**New Society**' where the rich and the poor, people from different castes and class will respect, support and love one another. This harmonious society is created by inculcating in the young - a spirit of love, compassion, service, justice, and equality. The young learn to celebrate differences and at the same time work towards eliminating all kinds of discriminations in the society. Thus they usher in '**A Culture of Solidarity**'.

PY-YAR is a love movement. The very idea of this movement was inspired from the experience of the young – the rich and the poor, the privileged and the disadvantaged – coming together and sharing their values and aspirations of a better society. They realized that love is the greatest gift they have received from God and it can be shared freely in abundance and generously with everyone. In the process of sharing love with one another they realize that we are children of the same God, who is Love Himself.

Then they call Him – Our Father!

## How does it work?

- ♥ The PY-YAR Movement initiates a process whereby a PY (Privileged Youth) and a YAR (Young At Risk) come in contact with each other **with a letter**. DB ARK takes the initiative to invite them to reach out to each other.
- ♥ Once they build up a warm relationship between each other, DB ARK invites a group of PYs and their corresponding YARs to come and spend **a day together** with a planned program. The purpose of this program is to build up a personal rapport. The presence and accompaniment of the DB ARK team will facilitate the relationship building among them.
- ♥ DB ARK will start **a common letter** with news and formative tips towards building up a New Society of love, friendship and equality.
- ♥ In the next phase we will explore the possibilities for the members to experience the life situations of each other. It will be planned with appropriate well designed **live-in experience** with the necessary accompaniment of the educators.
- ♥ The process will continue with further interactive interventions, which may lead to **generous initiatives** from each other towards the Holistic development of each other.
